### SPECIAL NOTES:

Previous generation SkyTrak attachments may be used with the above listed SkyTrak machines and serial numbers (proper load charts required).

Previous generation Lull E-Series attachments may be used with the above listed Lull E-Series machines and serial numbers (proper load charts required).

New standardized attachments are compatible with previous generation SkyTrak and Lull E-Series models (proper load charts required).

When using the fork mounted attachments on approved JLG models, always make sure to have the appropriate carriage load chart and operator and safety manual on hand.

<sup>1</sup> When using the fork mounted work platform, always reference the appropriate machine manual in conjunction with the operator and safety manual (pn-31200160) for installation instructions, proper machine configuration, proper operation and appropriate load rating.

<sup>2</sup> When using the fork mounted lifting hook, always reference the appropriate machine manual for installation instructions, proper machine configuration, proper operation and appropriate load rating.
