THE NEW STANDARD IN ENHANCED CONTROL PANEL PROTECTION

SkyGuard™ is the latest innovation from JLG that provides operators with enhanced control panel protection that doesn't limit platform workspace or visibility. When the sensor is activated, SkyGuard stops all functions in use at the time of activation and it's unique reverse functionality -- the first feature of it's kind in the market -- temporarily reverses most functions for a short period of time. SkyGuard is available as an aftermarket kit exclusively from JLG.

SkyGuard™
