If a customer orders a cab wire harness for an 8042 p/n 7114754, it is replaced by 7138521. The new harness has a row of fuses on the right. Bottom left is a light switch relay block, and left of that is an options block which takes a fuse. The 7138521 harness works on all models, 5028, 6036, 8042, 10042, 10054. The 8042 also requires a 7114604 harness which adds the stabilizer and boom switch relay blocks which are mounted on top of the light switch block. The 10042 requires the 7138521, 7114604, and 7099923 harnesses. The 10054 requires the 7138521, 7114604 and logic harness 7115114.
